

Mehmet Uzel

Product Engineer

mehmet@uzelabs.com · +90 531 793 25 94 · LinkedIn · GitHub · X

Product engineer with **7+** years of professional experience designing, building, and growing mobile, web, and AI products. My apps have reached **150,000+** downloads and generated **\$80,000+** in revenue; my content has earned **30** million+ organic views. I'm looking to join a team working toward a bigger mission.

Experience

UZELABS Limited · Founder / Product Engineer

Nov 2025 - Present | Istanbul

- Manage every stage of mobile and web product development. Built AI-assisted workflows to manage growth, marketing, subscriptions, and analytics independently.
- Listed my app portfolio for sale to focus fully on the shared mission of the next team I join.

Thomas Murray · Software Engineer

May 2022 - Nov 2025 | London, UK

- Collaborated with financial analysts to build a Python/Django system for monitoring, reporting, news collection, and AI/ML predictions.
- Automated and deployed services within the software team; mentored junior developers.

Huawei · Software Engineer

Sep 2021 - Apr 2022 | Istanbul

- Worked on Python-based 5G telecom data analysis and machine learning model deployment projects.

Felece · Software Engineer

Jan 2021 - Aug 2021 | Eskisehir

- Built Java/Spring and SAP Commerce (Hybris) e-commerce sites with the team; added store search, store pickup, and permission workflows.

Private Tutoring · Programming Tutor

Dec 2018 - Dec 2020 | Eskisehir

- Taught programming in English, remotely and in person, to students in Germany, Switzerland, the Netherlands, and Türkiye.

Education

Eskisehir Technical University · Bachelor's degree in Computer Engineering · GPA: 3.02/4.00 ·

Sep 2016 - Dec 2020

Data Science 102 Bootcamp · Python, data analysis, and machine learning · Aug 2020 - Oct 2020

Technical skills

Mobile: Flutter, SwiftUI

AI & LLMs: Agent Orchestration, LLM Workflow Automation, MCP, RAG, Fine-Tuning

Backend & data: Python, Django, FastAPI, Java, Spring, PostgreSQL

Cloud & tools: Docker, Git, Linux, GCP, AWS, Cloudflare, Firebase

Languages: English (C1) · Turkish (Native)

Hobby

AI & Science Video Series · Jul 2026 - Present | New video every day

- Enjoy producing a daily series on Instagram, YouTube, TikTok, and Facebook: **65** videos to date and **350,000+** views in the past **28** days.
- Using an MCP teleprompter I built, I record **10** days of content in one session, draft scripts with AI, and delegate all editing and publishing to AI agents.

Recent projects

Ödedimmi · Dec 2025 | Flutter, Firebase

- **110,000+** users and **\$30,000+** in revenue.
- Generated **20** million+ views through organic posts on X, TikTok, and Instagram.
- Financial assistant with synchronization across multiple accounts, available on mobile and web. Managed its development, publishing, and growth.

AI Estimates · 2024 | SwiftUI, OpenAI

- **10,000+** downloads and **\$10,000+** in revenue.
- Built a construction cost estimation app for contractors using SwiftUI and a fine-tuned OpenAI model.

Paytodo · 2023 | SwiftUI

- **50,000+** downloads and **\$40,000+** in revenue.
- Built a budgeting app for income and expense tracking and everyday money management.

AI Chatbot · 2023 | SwiftUI, OpenAI

- Designed, built, and published an iOS chatbot on the App Store using SwiftUI and the OpenAI API, before the official ChatGPT app was released.

Dutluktü · Aug 2026

- Built and launched a city-based advertising platform; reached **23,500+** visitors with more than **100** ads placed.
- My viral promotion generated strong interest. I responded to a subsequent DDoS attack by quickly deploying Cloudflare security measures and blocking the attack.
